Based on preference flow at September 2013 Federal Election

* Including ACT

These surveys were conducted among voters in all states of Australia and in both city and country areas. The data has been weighted to reflect the population distribution. This latest survey is based on a reanalysis of surveys conducted over January-March 2016 and is based on a total of 7508 interviews among voters. Individual state sample bases range from 749 to 2245 voters.

Note: sample size in Tasmania is too small for a meaningful separate analysis, however Tasmania is included in total figures. Northern Territory is excluded. Sampling error ranges from plus or minus 1.1 percentage points on the total sample to plus or minus 3.5 percentage points for the state with the smallest sample size.
