* Including ACT # For sex and age, final results used from Newspoll survey conducted September 3-5, 2013

Question: If a federal election for the house of representatives was held today, which one of the following would you vote for? If 'uncommitted', to which one of these do you have a leaning?

These surveys were conducted among voters in all states of Australia and in both city and country areas. The data has been weighted to reflect the population distribution. This latest survey is based on a reanalysis of surveys conducted in June 2016 and is based on a total of 5385 interviews among voters. Individual state sample bases range from 531 to 1739 voters. Note: sample size in Tasmania is too small for a meaningful separate analysis, however Tasmania is included in total figures. Northern Territory is excluded. Sampling error ranges from plus or minus 1.3 percentage points on the total sample to plus or minus 4.3 percentage points for the state with the smallest sample size. Copyright at all times remains with Newspoll.
