Preference flows based on recent federal and state elections *** Including ACT**

These surveys were conducted among voters in all states of Australia and in both city and country areas. The data has been weighted to reflect the population distribution. This latest survey is based on a reanalysis of surveys conducted between 24 January and 10 March 2019 and is based on a total of 6,393 interviews among voters. Individual state sample bases range from 562 to 2,032 voters. Note: sample size in Tasmania is too small for a meaningful separate analysis, however Tasmania is included in total figures. Sampling error ranges from plus or minus 1.2 percentage points on the total sample to plus or minus 4.1 percentage points for the state with the smallest sample size.
